Pollution in the Colliery area of Orissa

483. SHRI KRISHNA KUMAR BIRLA: Will the Minister of COAL be pleased to state:

(a) whether the attention of Government has been drawn to the report appearing in the Times of India dated 21st July, 1997 regarding suffering of thousands of people living in the IB Valley open cast coalfield in the colliery area; and

(b) if so, what remedial measures have been taken by Government in this regard?

THE MINISTER OF STATE OF THE MINISTRY OF COAL (SHRIMATI KANTI SINGH): (a) Yes Sir. The employees of Mahanadi Coalfields where other non-employees are staying. M.C.L. does not carry medical examination of people other than its own employees nor do MCL have any record of their medical examination. Health check-up of 3658 employees of MCL living in IB Valley has revealed that not even a single case of pneumoconiosis has been detected and confirmed. However two suspected cases are yet to be confirmed by Pneumoconiosis Board. Two T.B. cases have been detected. It may be noted that diseases such as T.B. & other respiratory problems are not related to coal dust.

(b) Measures for control of coal dust taken by MCL include control of dust at generation point itself by adopting wet drilling, using dust extractors, doing controled blasting, dust suppression by automatic water sprinklers both fixed point as well as mobile. Black topping of roads, raising of green belts, use of dust suppressing chemical and regenerative air vacuum cleaner is under active consideration of the management. Regular monitoring of air, water, noise and soil is being done through Central Mine Research Institute at Dhanbad.
